

FOREWARNER Pedestrian Warning Lights

For Forklift Trucks

Industrial plants have MHE, e.g. forklifts, heavy equipment and personal carriers busily working. Operators frequently multitask and are in a hurry to complete their tasks. Pedestrian workers are also busy doing their jobs in the same proximity as these material handling machines – with major safety hazards! **FOREWARNER** pedestrian warning lights for forklifts make “danger zones” for pedestrians instantly recognizable and **visible**. Our powerful high-quality lights project a solid BLUE, RED or GREEN spot, arrow or line beam on the floor alerting pedestrian workers to a forklift truck location and/or load and their proximity to the moving hazard.

FOREWARNER "ARROW" Blue or Red LED Warning Spotlight

FOREWARNER Blue or Red LED Arrow 10 cm flood light with 2 focused pencil beam projections. This warning light turns into an **arrow** on floor below and the arrow changes dimensions slightly the closer or farther from the projecting lens.

Size: 100 x 64 x 75 mm

FOREWARNER "MINI" Blue or Red LED Warning Spotlight

FOREWARNER MINI projects a 10 cm floodlight focused pencil LED beam either in red or blue.

Size: 100 x 64 x 75 mm

FOREWARNER Blue or Red LED Warning Spotlight with 9 focused LED

FOREWARNER Blue or Red LED Warning Spotlight with 9 focused LED. The light projects a solid BLUE or RED tightly focused spot on the floor behind or in front (or both) of the industrial truck or other moving vehicle. Many clients have RED in front and BLUE in rear. The FOREWARNER LED warning spotlight is acceptable for installation to all makes or model forklifts - internal combustion or electrics utilizing up to 48 volt batteries.

Size: Ø 14 cm diameter

FOREWARNER "SIDELINER" Green LASER or LED Warning Sidelight

FOREWARNER Green LASER or LED Pedestrian Warning Sidelight creating one focused green line. Green light is more visible in high light conditions than red. An installation on both sides of the truck creates a boundary effect and a “safe” and a “danger” zone on each side of the forklift.

Size: 65 x 65 x 55 mm Laser light*

Size: 200 X 67 X 90 mm LED light

* Due its small size FOREWARNER Sideliner Laser fits to most forklifts.

FOREWARNER Pedestrian Warning Lights

SPECIFICATIONS	Arrow	Mini	Spot	Sideliner LED	Sideliner Laser
General					
Beam	Arrow	Pencil	Spot	Line	Line

Installation/Delivery					
Packaging	Individual box with foam protection				
Cable length:	3,30 m				
Accessories	Adjustable 150 degree up/down stainless steel mounting brackets				
Magnetic feet					•
Certifications					
IP Rating	IP 67				
Approvals	ISO 9000, RoHS, CE				

ABOUT I.D. SYSTEMS

I.D. Systems is a global leader and innovator of supply chain technologies, providing advanced solutions for securing, controlling, tracking, and managing high-value enterprise assets, including industrial vehicles, rental cars, dry van trailers, intermodal containers and chassis, and cargo. The company's patented technologies address the needs of organizations to monitor and analyze their assets and operations to reduce costs, increase efficiency, productivity, and improve profitability.

BENEFITS ... at a glance

- Increased safety of operators, pedestrians workers, equipment and material
- Reduced costs due to less accidents
- Very effective for forklifts leaving trailers or blind aisles
- Easy installation in minutes to overhead guard or mast
